

TECH TIPS

FUEL PRESSURE SENSOR

REF. 1473501 | ASSEMBLY RECOMMENDATION

Only the black o-ring seal must be assembled, otherwise gasoil leaks could happen.
The metallic seal is for another pressure sensor assembling (OEM ref. 1920GW).

The o-ring is positioned at the
end of the thread

Equivalent PSA 1920TG

Recommended tightening torque: **45 Nm**
(risk of sensor breakage and deterioration of
the common rail).
